PROFESSIONAL SUMMARY

Business Analyst with 3+ years turning stakeholder requirements and large datasets into actionable dashboards, KPI reports, and process improvements across SaaS and enterprise environments. Skilled in SQL, Power BI, UAT, root cause analysis, and Agile delivery; experienced partnering with product, operations, and data engineering teams.

PROFESSIONAL EXPERIENCE

Institute for Applied AI (IAAI), American University

Research Analyst – Applied AI

Washington, DC

Jan 2026 – Present

- Gathered and documented requirements from 3+ stakeholders; translated needs into data specs and KPI dashboards.
- Built Tableau dashboards tracking AI adoption across 10 KPIs; surfaced actionable insights for leadership review.
- Performed root cause analysis on large datasets; validated data quality and documented findings cross-functionally.

American University, Office of Information Technology

Workday Technology Analyst Intern

Washington, DC

Jun 2025 – Dec 2025

- Analyzed 100K+ confidential student records using SQL and Alteryx designer; reduced data mapping errors by 30%.
- Designed validation checks and executed test scripts; resolved data quality issues with engineering end-to-end by 10%.
- Built recurring dashboards and documented requirements in Jira and Confluence across 6 sprint cycles.

Amazon Development Centre India

Senior Vendor Operations Associate

Mumbai, India

May 2021 – Jul 2024

- Queried 500K+ vendor records using SQL across APAC, EU, NA and EMEA; drove 25% SLA compliance improvement.
- Identified root causes and documented findings with audit trails; held resolution threads to increase verified fixes by 30%.
- Collaborated with product and engineering on SaaS/API workflows to standardize reporting across vendor portfolios.

SKILLS

Programming Languages	R, SQL, Python (Pandas, NumPy, TensorFlow), TypeScript, HTML, Java
BI & Data Visualization	Power BI, Tableau, Dashboard Design, Data Storytelling, Visio, Alteryx Designer
Business Analysis	Requirements Gathering, UAT, Process Mapping, Jira, KPI Reporting, Agile/Scrum
Data Platforms	BigQuery, Workday, SaaS Platforms, API/Integration Concepts, ETL, Data Modeling
Data Analytics	Predictive Modeling, Statistical Analysis, A/B Testing, Statistical Modeling, Regression
Core Skills	Cross-functional Collaboration, Stakeholder Communication, Root Cause Analysis

PROJECTS

Amazon Next-Day Return on Ad Spend Forecasting (R, SQL, Tableau): Built forecasting pipeline on 2M+ records; delivered interactive dashboard tracking forecast vs. actual ROAS for optimal Ad spending decisions.

Marketing Lead Source Analysis (SQL, Tableau): Analyzed full-funnel lead data; built dashboards and delivered channel investment recommendations to the marketing team.

Global Metro System Performance Analysis (Python, Excel, Power BI): Synthesized 1M+ operational records; identified under-performing metro systems and quantified impact for stakeholder prioritization.

LEADERSHIP

- **President, Analytics Club:** Led SQL, Python, and Tableau workshops; organized campus-wide datathon with 75+ participants at American University.
- **Kogod Graduate Ambassador:** Represented MS in Business Analytics & AI program; communicated outcomes to 50+ prospective students on behalf of university leadership.

EDUCATION

MS in Business Analytics and AI, American University, Kogod School of Business

Dec 2025

Relevant Coursework: Business Intelligence, Database & Big Data, Predictive Analytics, Python, Business Process Analysis

Bachelor of Management Studies, University of Mumbai

Oct 2020
